ACTIVITY: LET'S CREATE WITH AI

DETECTING AI: AI OR HUMAN?

The following activity is about identifying whether an image is real or produced by an AI. This experimental activity is an introduction to understand GANs (Generative Adversarial Networks). It proposes to discriminate real portraits from portraits generated by GAN. *Source of the pictures from GAN: https://thispersondoesnotexist.com Source of the pictures for real persons: https://pixabay.com/en/*

This tutorial can be used in the classroom.
