

NEUROFLASH

DESCRIPTION¹

Neuroflash is a German platform for generating text and images that can be adapted for educational purposes, whether for articles, social media posts, or teaching materials. It allows creating optimized and personalized content according to the needs of the teacher or institution.

FEATURES¹

- AI text generator: Instantly creates articles, summaries, or social media posts.
- ChatFlash: A personalized assistant that helps produce text according to the desired tone and style, useful for announcements, invitations, or other educational communications.
- ImageFlash: Generates royalty-free visuals to accompany posts or educational projects on social media (e.g., infographics or illustrations for lesson content).

EXAMPLE OF USE²

A teacher uses Neuroflash to create a post announcing a school event to share on Cartable. The text is generated with a tone suitable for the audience (parents, students, school community).

PRACTICAL TIPS²

- Content verification: It is essential to check the information and adjust generated texts to ensure alignment with educational objectives and institutional values.
