

LEARNING AND TEACHING AI AS A TEACHER

The AI training content below is drawn from teacher experiences shared on the French MOOC "Artificial intelligence for and by teachers" – visited on 01/07/2025.

Additional information (e.g., country of origin) was extracted from the official websites of each tool.

COURSERA FOR EDUCATORS

Coursera offers online courses for teachers, including the use of AI in education. Training covers educational data analysis, classroom management, and using AI to personalize learning.

CAVILAM

Cavilam provides pedagogical resources (PDF format) to guide French and foreign language teachers in using artificial intelligence.

Resources include

- Introduction to AI in teaching
 - How to use prompts effectively with AI
 - Saving time in lesson planning
 - Writing support using AI
 - Using AI for vocabulary practice
 - Promoting learner autonomy
-

AI4T

Platform offering training and pedagogical resources for integrating AI into teaching, with practical modules, concrete examples, and tools for educators.

PIX – TRAINING CAMPAIGNS

Website for training teachers and students in digital skills, with a focus on AI use and digital competency assessment.

AI-EDUC – UNESCO

Supports high schools in their digital and ecological transition. Provides pedagogical resources, training, and tools to help teachers and students understand and responsibly use AI.

Educational Objectives

- Raise student awareness of the educational and societal impacts of AI
- Provide teachers with tools and resources for integrating AI into practice
- Promote ethical and responsible AI use in schools

Available Content and Resources

- Training modules: online courses and workshops on AI fundamentals and applications in education
- Pedagogical resources: guides, case studies, examples of AI integration across disciplines
- Community space: forums and collaborative spaces to share experiences and best practices
