FEEDBACK

This section compiles, structures and summarises all the educational uses and AI tools mentioned in the contributions to the forum[1] of this MOOC.
The survey of educational uses presented covers more than 800 messages from teachers who shared their experiences with generative AI between November 2023 and October 2025.

This summary of the educational uses of AI allows you to:

- Quickly discover tips and best practices without reading the entire forum
- Access the tools directly via the links provided
- Identify uses that can be adapted to your context

After consulting this section, feel free to share your uses, thoughts or difficulties to collectively enrich the MOOC forum on FUN.

AI TOOLS MENTIONED IN THE MOOC FORUM

Teaching level	AI tool used	Use in an educational context	Links
All	Firefly	Generate an artistic image	See
All	Capcut	Create and edit videos	See
All	Copilot	Generate content, assist in creating digital content on Microsoft software	See
All	Dall-e	Generate an image from text	See
All	ElevenLabs	Generate or transcribe a voice	See
All	Heygen	Transform text into video	See

Teaching level	AI tool used	Use in an educational context	Links
All	Kling	Generate professional-quality videos and images	See
All	Krea	Create images, illustrations, and educational visuals	See
All	Leonardo	Create artistic images and videos	See
All	Luma Labs	Generate 3D videos and renders from photos and text	See
All	Magic School	Create educational pathways and activities	See
All	Neuroflash	Create and optimize text and image content	See
All	Pika	Generate videos with animations from a prompt, image, or video	See
All	Stable Diffusion	Generate detailed and artistic images from text	See
All	Sydologie	Generate and enhance the creation of educational activities	See
All	TTS Maker	Generate a voice from text	See
All	Udio	Generate audio from text descriptions	See
All	Vidnoz	Generate and enhance videos, voices, music, or images	See
All	Wave	Create, edit, host, and share educational videos	See

Teaching level	AI tool used	Use in an educational context	Links
All	Wooflash	Generate educational resources and track student progress	See
Elementary school	Lalilo	Use AI for inclusive pedagogy	See
Middle school	Cuentito	Generate an illustrated story for children	See
High School / University	Briskteaching	Generate personalized educational materials with Google	See
High School / University	Gamma	CreatepPresentations and design a website	See
High School / University	Miro	Organise, structure, and generate ideas on a virtual whiteboard	See
High School / University	Mizou	Creation of a learning chatbot	See
High School / University	Perplexity	Obtain information by synthesizing multiple sources	See
High School / University	Poe	Chatting with different AI models	See
High School / University	Sketchbook	Create sketches and digital art	See
High School / University	Teachable machine	Train a computer to recognize your images, sounds, or poses	See
University	ResearchRabbit	Explore, structure, and track academic literature	See

EDUCATIONAL APPLICATIONS

Teaching level	Educational function	Description	Links
All	Using an AI image generation tool	AI image creation tools mentioned in the AI4T forum	See
All	Using an AI quiz generation tool	AI quiz creation tools mentioned in the AI4T forum	See
All	Using an AI video creation tool	AI video creation tools mentioned in the AI4T forum	See
All	Facilitating inclusive teaching with AI	AI methods and tools to support accessibility and differentiation in the classroom	See
All	Learning and teaching AI as a teacher	Platforms for AI training aimed at educators	See
All	Grading assignments with the help of AI	AI principles and tools to assist teachers with grading	See
All	Enhancing generative AI responses with specialized data (RAG)	Method and tools to enhance AI responses with Retrieval-Augmented Generation	See
All	Supporting students in their learning	Self-directed learning platforms with AI	See
Middle school	Raising Awareness of Natural Disasters with AI	Educational activities to raise student awareness of natural disaster risks	See
Middle school	Supporting mathematics learning	Digital tools for customising mathematics learning	See
High school	Teaching AI through digital creation	Tools and teaching scenarios to introduce the	See

Teaching level	Educational function	Description	Links
		fundamental concepts of AI	
University	Analysing data in social sciences	Tools for analysing texts and qualitative data	See
University	Prompting Methodology	Methods for effective use of conversational AI	See
University	Searching and extracting DOIs with AI	Tools and tips to search, extract, or add DOIs	See
University	Writing articles with AI assistance	AI tools to assist with article writing	See
