POE

DESCRIPTION[1]

Poe (Platform for Open Exploration) is an American conversational platform that allows users to interact with several advanced AI models, including GPT-4.

FEATURES[1]

- Interactive chatbot: Poe allows users to have realistic conversations with AI models such as GPT-4, facilitating access to information in a natural and interactive way.
- Content creation: Users can generate content, whether for writing articles, generating creative ideas, or even assisting with academic and professional writing.
- Access to multiple models: Poe allows users to switch between different AI models, depending on their specific needs, for more detailed or creative responses.

USE CASE[2]

UA physics teacher uses Poe to help his students understand Newton's laws. Each student can choose a model to ask specific questions, and the AI provides explanations. The goal is to compare results and learn how to use AI with a critical eye.
